

Ravenna, 1st to 8th of October 2016

1. Student's presentation:

Anti-Democratic Administrations and consequences Research – Learning From The Past
Student can present a video, a paper or short presentation about this theme choosing their own way to examine this topic.

2 Intellectual Output: Online democracy course

For this part I will need an object from each of you: we will have in this way 9 activities/objects showing a possible online democracy course. These materials will be uploaded here <http://exp.itisravenna.it/moodle/course/view.php?id=98> You can enter as a guest, as everyone. So for this part I would need your cooperation!

Multiplier event: Democracy and active citizenship (Workshop for teachers and some local people from other schools and universities).

Young Parliament: Environment in my country

The session of the Parliament will end with a cooperative activity using **mosaics** as technique that represents cooperation. Every country will prepare a drawing, using only 4 simple colors and white (Blue, Yellow, Red, Green, white) without any outlines, using schematic drawing. You should send us the images that should fit into a square of 50X50 cm (use a scale if you want).

The main idea is the Environment I dream, trying to avoid the same time stereotypes... Let's say more a logo than a picture. In Ravenna they will realize this logos using mosaics at the School of Art and then we will hang all them together.

Learning activity: Who should I turn to? This activity will be done in collaboration with the theatre company I mentioned (<http://www.teatrodellealbe.com/eng/contenuto.php?id=4>)
